

**Report of the Communications Committee of
the Thetis Island Residents' & Ratepayers' Association**

Espokes continues its much used and appreciated service, and is very grateful to the dedicated volunteers who keep it going.

The next **phone book** is being worked on. If you are new to the island, please be sure I have your names and contact information. Or if you have neighbours who are new, please encourage them to do the same. Even if you or they don't want to be "in the book" at this point, the database is there for when contact is necessary. Let me know at veronicashelford@gmail.com.

Fifteen **welcome packages** have been provided to new residents since January 2022.

thetisland.net: The webcam upgrade is waiting for Sony Falardeau, the tech person at Capernwray, to have time to tackle it. He estimates he can deal with it around the end of October.

If you have any questions about any of the communications venues associated with TIRRA, just let me know.

Respectfully submitted,
Veronica Shelford
