

St. Margaret's Cemetery TIRRA Report September 25,2023

Not mentioned in a previous report of June 2023, the cemetery had a successful clean up day on May 7, 2023. The memorial stones in all parts of the cemetery were cleaned and edged with mulch. Many thanks to Simone Luckham who prepped all the markers in advance which gave us an opportunity to get every stone cleaned up. The works yard was organized and discussions for the construction of a storage shed resulted in a plan to move forward with that in the fall of 2023. Weed whacking was done along the paths and edges. The cleanup was followed by a picnic lunch in the cemetery with discussions about how to proceed with the care and maintenance of the grounds in general.

A Green burial committee has been struck and has begun the research in to the planning and development of a Green Burial and a natural burial area in the cemetery. They will report to the cemetery board at the annual AGM which will take place in May 2024.
