

St. Margaret's Cemetery Annual Report TIRRA AGM March 2024

The cemetery has been quiet this last year. There were 4 interments of cremated remains. Two cremation plots were sold.

A committee was struck in the fall of 2023 to investigate and explore the possible development of a green or natural burial area in the undeveloped portion of the cemetery. The committee has been working hard over the winter researching green burial practises including a visit to Salt Spring Natural Burial Cemetery. One of the owners and developers of the Salt spring Green Burial grounds, a for profit enterprise, came to Thetis to do a presentation and information session on their practise. Thetis island Nature Conservancy (ThINC) was invited to do a stewardship assessment of the undeveloped area to provide aid in how the new development can be implemented in a sustainable and ecological way.

The annual clean up in June of 23 was well attended.

Maintenance at the cemetery continues. Sid Mawson has moved the water bins to a new location and been at work repairing the leak.

We remain grateful to Norm Kasting for his continued lawn mowing.

The annual financial report is forthcoming.
