

TIRRA Trail Report November, 2021

Lawrence Trail

- Recent signage to delineate the trail is being relocated and in some cases, removed. More trail markers have been ordered.
- Historical signage still in the works - for wording of signs. Funding of this to be confirmed.
- Thanks to Guy Counsell who removed two fallen trees at the Kenwood end

Lawrence Valley Loop

- Reminder that this trail is a meadow habitat, tending to flood and is prone to closures.
- Significant trail maintenance was required to keep the trail open

Dingly Dell Trail

- Caution sign posted near WWOOFER Bridge - bank rebuild in this area is in progress.

A recent request for opening trails to cyclists has been put forth and the committee currently declined this request as trails are not built width-wise and path bed for cyclists. Re-doing trails to accommodate cyclists would be very expensive and time-consuming. Consideration for future bike trail will be reviewed.

All trail licences have been signed and are up-to-date. We welcome additions to our trail system - please contact the Trail Committee.

Continued thanks to Ron & Eleanor, Pierre & Yuka for their hard work in maintaining the trail network.
