

TIRRA Trail Report for 2023 AGM

Dingly Dell Trail

- A plan to deal with invasive holly has been discussed with Jollity Farm.
- Steps need to be checked and rebar re-pounded

Lawrence Valley Loop

- Re-open the Trail
- Plan to re-attach larger walking planks at Dingly Dell end is under review.
- Whacking back sedge grass under blocks will be underway soon - thanks to Gok Sarioglu for the loan of his specialized blade (to be replaced as soon as possible).

Lawrence (Community) Trail

- Mission Road end water mitigation across the trail is holding up - an ongoing project
- Kenwood Road end water level is rising consistently over the trail causing very muddy conditions - build boardwalks over most affected areas.
- Use of cedar boughs has some effect as matting, but does not work for all areas.
- Adjacent bog level seems to be affected by a raised adjacent pond level
- Trail path is muddy/boggy in all areas
- Building of boardwalks will commence this spring and will require the support of several volunteers for carrying in supplies and building the bridge on site
- An appeal will be forthcoming to the community for off-cut pieces measuring at least 24" in width of 2x4, 2x6, 2x8 to be donated.
- Other supplies will need to be purchased
- Runners will need to be environmentally friendly treated as this is a habitat area.
