

TIRRA Trail Report
May 2025 AGM
(Last report January 2025)

Dingly Dell (Bond Family)

- Spring maintenance required on grass and blackberries
- Trail Stewards - Adam Sandall and Monica Harvey

Mt. Burchell (Kasting Family)

- All good
- Trail Stewards - Helen Bird, Gloria Taylor, Eleanor Vandergaag, Michelle Sutter, Sharon Moloney

Lawrence Community Trail (Kasting Family, TIRRA)

- Kenwood end still swamped, posted detour still in effect thanks to Meadow Valley Strata
- It appears people continue to use a private property path instead of the signed trail over the ridge
- Trail Steward - Margaret Woodhouse

Lawrence Valley Loop (Dickie Family, Cowichan Land Trust, TRAX, Kasting Family)

- Spring maintenance required on grass, blackberries, rose bushes
- Valley bottom boardwalk secured by capped angle iron posts to reduce drifting - is holding well.
- Trail Stewards - Sue French and Nan Beals

As the Lawrence Valley Loop trail tends to be flooded in the rainy season, consideration must be given to a more permanent solution to the situation. Currently the breeze blocks which are in place are eroding and need to be removed. In addition, boards that are in place leading to the meadow bottom are very slippery, rotting and need to be replaced. Further, some areas have become more slippery but are not flooded.

A preliminary look into these situations, was discussed as follows:

A few steps could be established closer to the beginning of the trail to avoid the slippery section. This portion wouldn't require an expense.

The next section before the meadow valley bottom where long slippery boards currently are, these boards need to be removed and could easily be replaced by large cedar rounds as this area doesn't experience significant flooding. Minimal cost would be incurred if the rounds could be donated.

Meadow valley bottom where flooding is significant during the rainy months, the trail committee has proposed a boardwalk as a possible solution once the breeze blocks have been removed. Initial measurements indicate that a cedar boardwalk would cost out at approximately \$5,000.00.

The alternative to constructing a boardwalk over this well-used trail through a unique environment would be to close it through the wet season.

We are grateful to all the property owners who have made our wonderful trails possible and we wish to acknowledge the assistance of all our trail stewards.
