

TIRRA Solid Waste Committee
Report to March 18, 2023 AGM

This has been a year of significant involvement by many people who have invested many hours dealing with our recycling issues. Paul Duncan, in particular, started the year with a lengthy analysis of our system including many options. It took most of the rest of the year to finally put the question to all the stakeholders. I want to thank the TIRRA executive and Veronica Shelford for their many hours of effort and meetings in order to organize this vote. In the end we have decided that it is more efficient for islanders to take their recycling off island when they do a town trip.

This coming year we hope to reduce our garbage volumes which have always had too high a percentage of recycled materials mixed in. Thanks to those islanders who do a great job of keeping recycling out of their garbage. Our total weight for 2021 was 20.5 MT and for last year was 18.7 MT which is good progress. We have raised the garbage fees this year to add a little more incentive to reducing our garbage weight. Our best incentive should be the fact that our garbage is shipped out of the country. How green is that?

Special thanks to Louise who kept the yard open even on some very chilly days this winter. And to Wendy who has put an amazing amount of time and effort as the chair of TIRRA and as a member of the Solid waste Com.

Respectfully submitted,
Ernie Hunter
