

TIRRA AGM
Forbes Hall June 29, 2023, 7PM

Attendees

Acting/Past President: Wendy Hinsperger

Treasurer and Solid Waste Chairperson: Ernie Hunter

Secretary: Georgina Maule

Communications Chairperson: Veronica Shelford

St Margaret's Cemetery Chairperson: Suzanne Sarioglu

Note: Transportation Chairperson and President roles currently vacant.

Absent: Vice President; Quentin Goodbody, Trails; Vicki Walker/Doug Fenton

Wendy called the meeting to order at 7PM: "We are grateful tonight as we gather on unceded territories of Penelakut and Lyackson Peoples." Wendy welcomed everyone and acknowledged sufficient attendance for quorum. Total in attendance 17. The meeting being recorded for minute taking purposes only.

MOTION: Adoption of last General Meeting Minutes March 18, 2023

Motioned: Veronica Seconded: Jeannine Vote by Members: Approved

Prepared TIRRA Executive Reports may be found online at TIRRA partition of thetisisland.net Updates and discussion from Committees over and above posted reports.

St Margaret's Cemetery: Suzanne reported on progress being made in research on burial site options, such as Green Burials. Full Burial sites are no longer available; cremation sites are still available. New board member is Sid Mawson who will be taking care of general maintenance. Thanks to TIRRA for assistance in funding of Puller Bear tool to clear blackberry and holly: tool will be utilized by Trails as well.

Trails: Report summarized by Wendy as no Trail rep attending – as posted on TIRRA website, focus on flooding in the north end by beavers: new detour: be respectful of private owner properties. Clean up of broom and holly; Vicki connecting with prospects for new trails.

Transportation: Verbal report by Wendy Two issues raised by members prior to meeting: Mosquito Abatement and Road Safety. See Member Forum: last item on agenda.

Communications: Veronica reporting on Espokes, Internet site, Phone Book, and Newcomers

Espokes site costs \$108.00 US year: currently 700 subscribers! (Thanks to Matt and Claire Hess for sourcing new provider).

Internet site thetisisland.net costs \$165/year; costs could double if current server fails.

Phone Book – next issue at end of year: hoping new post boxes are available for next print

Visitor's Guide 2023 printed

Welcome Packages: Thank you to Susan Unger for prep of packages and Bev Greene/Greg Gall for greeting newcomers. Thank you to Tim French for website and camera necessary to provide ferry lineup view for last 20 years! Capernwray is now administering the site. Thank you! Equipment upgrade research being undertaken. Costs expected to be under \$1000 so TIRRA Exec can approve once details known. Show of hand requested as to value of funding this service; Supported.

Treasurer's Report: Ernie Hunter – Financial report as posted Shows \$14,000 in General Funds and \$20,000 in Facility Funds. We have not yet received TIRRA 2023 membership dues from TICA: so not reflected in finances. We appreciate the work TICA volunteers undertake to collect membership fees on our behalf.

Solid Waste Report: Ernie Hunter - Garbage fees income remains constant to prior years: recognizing volume is down and fees are up. There seems to be a heightened awareness of keeping recyclables and organics out of garbage. Will be better able to assess after summer period: SW team will review prepaid card usage and weights to understand current

volumes. David Reay asked if we could coordinate Solid Waste management with Penelakut: Ernie advised this not possible due to subsidization of Penelakut system. Lucy Mooney asked if more gravel could be placed near refundables where it can get muddy: Wendy will talk to Joe/Emcon. Other discussion around site operation: encouraging personal accountabilities for proper solid waste practices. Historically 64 Metric Tonnes hauled per year before fees were introduced in 2013/14. Now 18MT

Community Partners

Water Storage at Construction Sites: Jeannine notes increased contractor and Fire Dept coordination since joint meeting held on how to prepare sites during extreme dry conditions. Great cooperation observed.

Ferry Advisory Committee: Ferry maintenance from after Thanksgiving to early December. The MV Kahloke will be used. Pat Mooney noted capacity is 21 cars versus 28.

Other TIRRA Updates:

Bylaws: Claire and Matt Hess working with Wendy on the Bylaws- updating using Model Bylaws document, and creating a Standing Rules document for details not required under Provincial guidelines. Anyone interested in assisting in editing, reviewing TIRRA Bylaws/Mission/Vision/Code of Conduct statements, contact Wendy.

Members Forum:

Property Tax Increase: Paul Duncan and David Reay would like to encourage formation of a group to research and recommend at the fall TIRRA meeting, a more proactive approach to obtaining property tax information.

Goals:

-review taxation issues and liaise with organizations that impact our taxes to reach consensus on a "Value for Money" proposition, including early notification of anticipated increases, disclosure of what other options were considered and how specific value is being created for islanders.

- Lobby for Area G Director to ensure CVRD/IT are hyper-responsive to grant support requests from Thetis: (grants from Provincial and Federal Gov't require either IT or CVRD support depending on Ministry).

Individuals who wish to participate in an adhoc committee to get this started and make recommendations to TIRRA Executive? Let Paul or David know of your interest.

Road Safety: Issue raised by two members and recent accident has highlighted need for a Road Safety review.

Generally, residents are aware of the more dangerous spots on the island, however signage should be improved for visitors, and to remind us all to "share the road". Joe from Emcon has agreed to lobby MOTI for signage once our needs are determined.

All businesses or residents interacting with visitors should advise our roads are narrow, walking is sometimes difficult as no road shoulder, and if driving, cycling or walking, we must share the road and TRY to obey all signage regarding speed and usage. Also, some EV vehicles cannot be heard approaching! Advice to walkers and bikers: dappled sunlight and darker areas when drivers are wearing sunglasses make it difficult to see others using the road. PLEASE aid visibility by wearing brighter clothing.

If you wish to join an adhoc committee to assess signage and education needs, let Wendy know. This will include some road safety creative communications for Espokes: get your inner writer energized!

Mosquito Abatement Discussion: Many different actions have been taken over the years, and often this has involved TIRRA Executive, though not as an official mandate. Some community members are working on fundraising the estimated \$15K to fix the Culvert at Harbour Road/Pilkey Point. Any fixes at this location will not occur in 2023 due to work required and materials required. Discussion on treatments and costs, and personal property review for wet areas or stagnant water.

MOTION: Pat Mooney: Moved that TIRRA Executive be asked to write a letter on behalf of TIRRA membership, to Islands Trust Local Trust Committee members, demanding enforcement of bylaws with respect to Lot 88: leading to final resolution of a clean up of the property as per bylaws. Second David Reay. Discussed, called: Approved
